

# 42 TV RANGE

MULTIFUNCTIONAL SUPPORTING BASES

## CHARACTERISTICS AND ADVANTAGES

### A WIDE, MULTIFUNCTIONAL RANGE

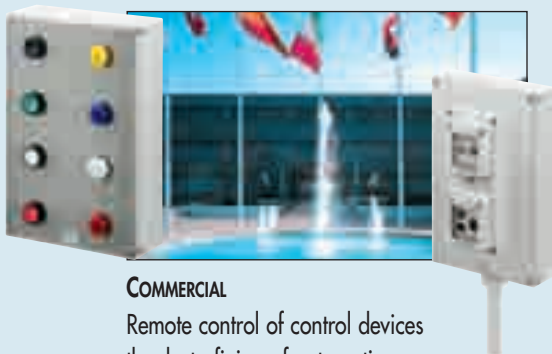

Boards available in three sizes of varying depth as, well as the distribution pillar.

42 TV RANGE

### A RANGE OF UNIVERSAL APPLICATION

The boards can be used as support bases for fixing a wide variety of devices, such as electronic appliances and interlocked socket-outlets.

#### COMMERCIAL

Remote control of control devices thanks to fixing of automatic equipment by means of screws.

#### INDUSTRIAL

The watertight floor standing distribution pillars are ideal also in an industrial environment.

# 42 TV RANGE

MULTIFUNCTIONAL SUPPORTING BASES

## CHARACTERISTICS AND ADVANTAGES

### MULTIFUNCTIONALITY

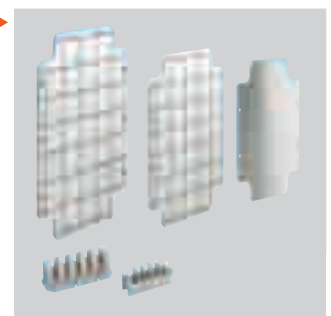

High modularity is achieved by using specific GW 26 406 couplings.

◀ The front panel is reversible: the smooth surface of one side facilitates the fixing of flush-mounting components, whereas the honeycombing on the other side facilitates open fixing of devices.

◀ The guides tracks on the back facilitate the fixing of terminal blocks and back-mounting plates made out of metal or insulating material.

The 42TV range is entirely made of high-quality thermoplastic materials. Once it is installed, double insulation can be re-established using the special screwcaps or the brackets.
