

## CHARACTERISTICS AND ADVANTAGES

### ARCOBALENO MEDIUM SIZE FLEXIBLE FK15-CONDUITS

A choice of different colours in order to distinguish various lines: a valid solution in today's increasingly complex and structured electrical installations. FK 15 conduits hold IMQ certification in compliance with EN 50086-1 and EN 50086-2-2 Standards and in conformity with IEC EN 61386-1 and IEC EN 61386-22 Standards.

FK RANGE

### SELF-RECOVERING HALOGEN-FREE MEDIUM SIZE PLIABLE CONDUITS ICTA

Halogen-free conduits in compliance with EN 50267-2-2 Standard particularly suitable for installations in public places where, in the event of fire, besides flame containment, low emission of halogens is required. ICTA conduits hold IMQ certification in compliance with EN 50086-1 and EN 50086-2-2 and are in conformity with EC EN 61386-1 and IEC EN 61386-22 Standard.

## CHARACTERISTICS AND ADVANTAGES

### ICTA CONDUIT

ICTA self-recovering halogen free-conduits are ideal for installations in public places: due to the halogen-free material, smoke emissions, in case of fire, show a lower opacity and lower toxic emissions.

- ◀ Also ideal for installations under floors as their self-recovering capacity is higher than that of normal corrugated conduits: they can support loads up to 750 N showing a maximum deformation of 50% in diameter under stress and a permanent maximum deformation of 10% after the load has been removed.

### PROTECTION - PROTECTED PACKAGING

The new pallet packaging system ensures better weather resistance and better preservation over time, especially when stored outdoors.

Top surface with plastic protection

Each roll is packaged in transparent shrink-wrapping, showing the GEWISS logo and label.

Visible label on each side, showing details about the material.

The pallet is wrapped in extensible protective white film, which is more resistant to atmospheric agents and UV rays.

Wooden pallet.

### NEW PROFILE FLEXIBILITY

The new geometric profile of the conduits provides higher flexibility, load resistance (+15% to compression) and reduced thermal memory which makes lay operations in the raceways easier and quicker.

### PURITY AND QUALITY WITHOUT COMPROMISE

Gewiss has always used only top quality material, to ensure quality without compromise throughout its range.

The white version of the corrugated conduit particularly emphasizes this choice of quality.
