

FU CABLE DUCT

FLEXIBILITY OF INSTALLATION

The shape of the two walls allows using minimum curvature radiuses (equal to 10 times the external diameter of the conduit) and laying in not perfectly aligned trenches.

FU AND PZ RANGE

EASY CABLE INSERTION

The perfectly smooth internal walls ensure that cable insertion is easily and speedily carried out.

REDUCED LAYING TIMES

FU range cable ducts in 25 and 50 metre rolls reduce the number of jointing pieces needed.

WELLS - PZ

LIGHT AND PRACTICAL TO USE

Made of thermoplastic with pre-cut holes and bases, the stackable PZ range provides a valid alternative to traditional cement wells.

VERSATILITY OF APPLICATION

Ideal for horizontals as dividers in electrical and telecommunications installations. Especially suitable for public lighting systems or for earth connection installations.

WIDE RANGE

The new PZ well range comes in a range of sizes for all installation needs.

MEASUREMENTS

200x200x200 mm
300x300x300 mm
400x400x400 mm
550x550x480 mm
360x260x320 mm

HEAVY-DUTY COVERS

The heavy-duty covers can be firmly fitted quickly and safely using the 4 self-threading stainless steel screws.
