

## SP RANGE

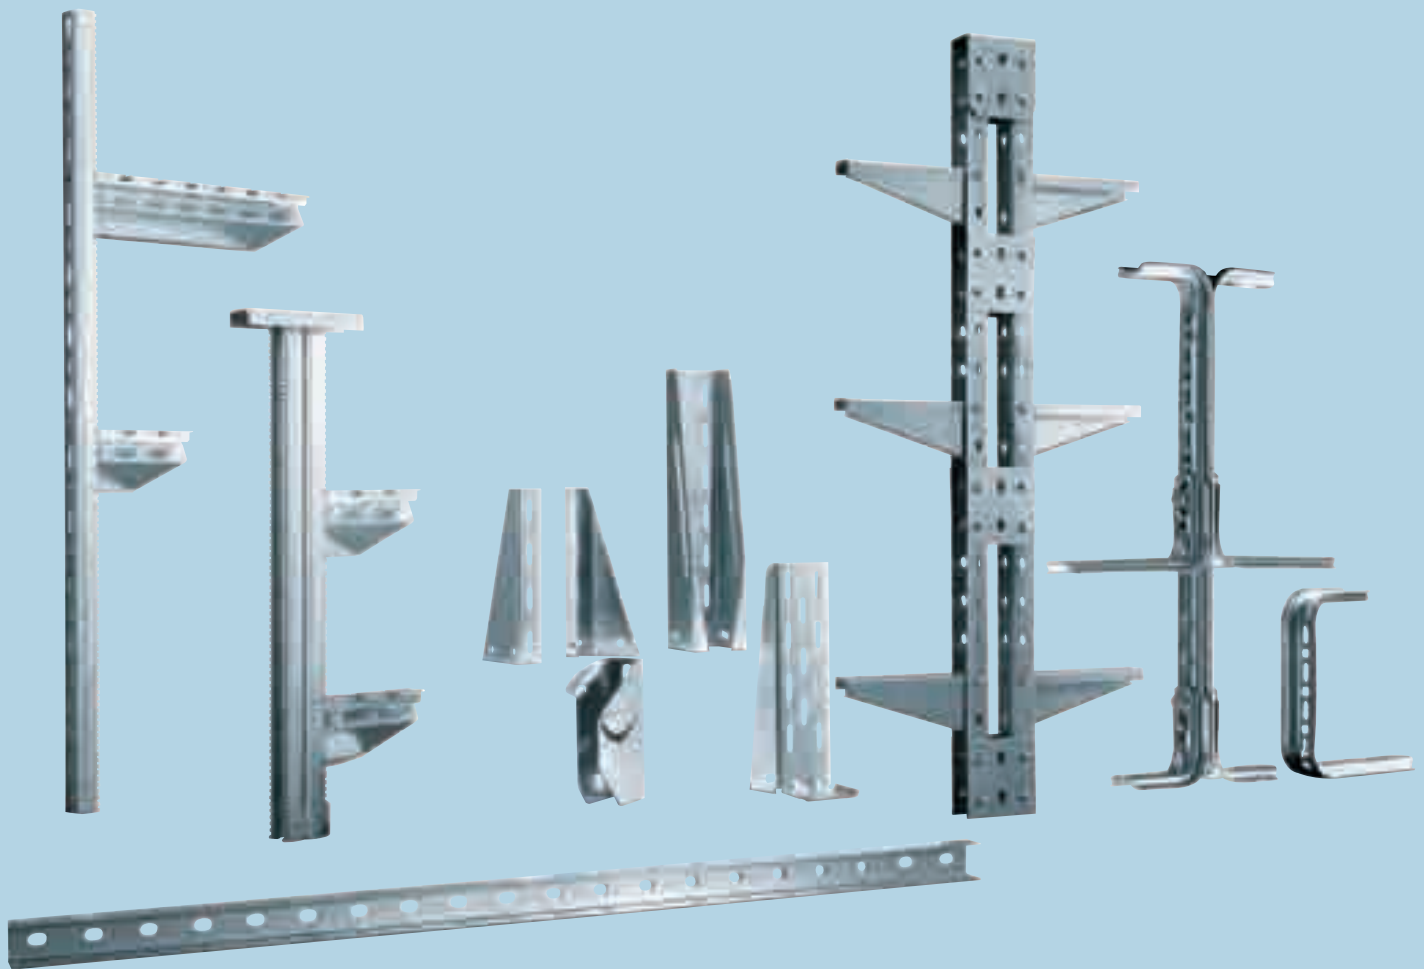

CABLE TRAYS SUPPORT SYSTEMS

GEWISS

### CHARACTERISTICS AND ADVANTAGES

#### A FUNCTIONAL RANGE

SP range supports and brackets can be used with all cable trays and are selected depending on use: Light, medium, heavy loads.

#### PRACTICAL AND ECONOMICAL

Clip-on brackets, serrated profiles for quick, safe fixing and fixing accessories which do not require special tools.

## CHARACTERISTICS AND ADVANTAGES

### LIGHT LOADS

#### OMEGA RANGE

OMEGA supports are made to bear light loads. Easy to assemble, brackets can be fixed onto frames or directly onto walls.

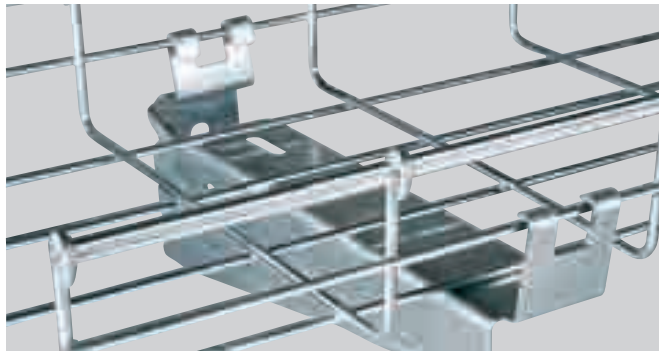

Clip "Filmatic" allows the BFR wire mesh cable trays to be tightly fixed onto the OMEGA type brackets without bolts or tools.

### NEWS

OMEGA RANGE IS NOW AVAILABLE IN ALL SIZES ALSO WITH STAINLESS STEEL FINISH

### MEDIUM LOADS

#### 40 TYPE RANGE

40 type range is made of brackets and frames which can be assembled to create complex supports suitable for multiple cable tray lines.

BFR brackets, are equipped with a quick clip-on system which allows BFR cable trays to be fixed without accessories or tools.

### NEWS

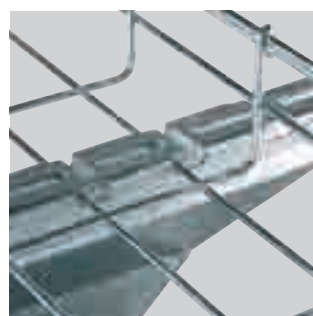

ALL BRACKETS, PROFILES AND FLANGES INCLUDED IN THE RANGE 40 ARE NOW AVAILABLE IN STAINLESS STEEL

### HEAVY LOADS

#### MAVISTRUT RANGE

MAVISTRUT range for heavy loads consists of a serrated shaped frame where the brackets are quickly and safely interlocked.

MAVISTRUT brackets are equipped with special gaps where the BFR wire mesh cable tray can be housed and fixed directly without requiring accessories
